THE CHANGING ECOLOGY OF LEARNING: INFORMATION AND COMMUNICATION TECHNOLOGY (ICT) IN EDUCATION

The Board of the Victor Ordoñez Fides Foundation invites participants to afternoon conversations of sharing on the current technology in education entitled *The Changing Ecology of Learning: Information and Communication Technology (ICT) in Education* on July 29, 2013, 1:30 p.m. at the Pearl Hall, SEAMEO-INNOTECH, Commonwealth Avenue, Diliman, Quezon City.

The Conversations aim to:

1. expand upon one of Dr. Victor Ordonez's pioneering themes in education, in which he stated: "*Students are technology natives; we older ones are migrants,*" as a way of honoring his legacy; and
2. share insights on how the technology-savvy students learn in today's classroom, the surprising encounters with the reality of ICT, and innovations that have come out of experiences among the participants.

This activity will be led by Dr. Molly N. Lee, Education Consultant and former Programme Specialist in Higher Education in UNESCO's Bangkok regional office. Her professional expertise is in higher education, teacher education, ICT in education, and education for sustainable development.

The education leaders, academics, and other individuals from corporate foundations and non-government organizations (NGOs) who share Mr. Ordoñez' passion for looking into diverse areas of learning and surfacing new ideas for future learners are invited to attend these conversations.
