7th INTERNATIONAL CONFERENCE ON ETHNOMATHEMATICS

The 7th International Conference on Ethnomathematics (ICEm-7) will be held virtually on December 7–10, 2022, with the theme Ethnomathematics: Embracing Diverse Knowledge Systems for Social Justice and Peace.

The International Conference on Ethnomathematics takes place every four years under the auspices of the International Study Group on Ethnomathematics (ISGEM). It brings together ethnomathematicians and scholars investigating the interplay of mathematics and culture in different parts of the world, as well as individuals and organizations interested in knowing, sharing, interrogating, and/or debating the practice of ethnomathematics.

This will be hosted jointly by academic institutions in Asia and the South Pacific, a culturally diverse region with a burgeoning scholarship on ethnomathematics. The conference shall feature distinguished colleagues in the region and mathematics educators across the world who are working in the field of ethnomathematics.

Interested participants may visit the conference website at <https://icem7.org/> for registration details and other information about ICEm-7.
